# **5<sup>th</sup> International Triticeae Symposium Prague, Czech Republic June 6–10, 2005**

Under auspice of  
**Ministry of Agriculture of the Czech Republic**

## **Proceedings**

Edited by

**Vojtěch Holubec, Mary Barkworth and Roland von Bothmer**

**Organizers:**

**Research Institute of Crop Production  
Department of Gene Bank, Prague, Czech Republic**

**Czech University of Agriculture Prague, Department  
of Botany and Plant Physiology, Prague, Czech Republic**

## Contents

|   |   |
|---|---|
| BOTHMER R. VON , BARKWORTH M.E., HOLUBEC V.: Preface .....  | 1 |
| BARKWORTH M.E., BOTHMER R. VON : Twenty-one years later: the impact of Löve and Dewey's genomic classification proposal ..... | 3 |

### SESSION I: SYSTEMATICS AND PHYLOGENY

CHAIRMANS: JAN VALKOUN, KAZUHIRO SATO, BERNARD BAUM

|  |    |
|--|----|
| ANAMTHAWAT-JÓNSSON K.: The <i>Leymus</i> N <sup>s</sup> -genome (key note) .....   | 13 |
| MASON-GAMER R.J., M.M. BURNS, M. NAUM: Polyploidy, introgression, and complex phylogenetic patterns within <i>Elymus</i> (key note) .....                      | 21 |
| BAREĚ J., HAJNALOVÁ E., HAJNALOVÁ M., KOMÁRKOVÁ V.: Archaeobotany of <i>Triticum</i> in prehistory: domestication, spread and speciation (abstract only) ..... | 27 |
| PETERSEN G., SEBERG O.: Phylogenetic Analysis of allopolyploid species .....   | 28 |
| SEBERG O., PETERSEN G.: Incongruence and the phylogeny of the <i>Triticeae</i> ( <i>Poaceae</i> ) (abstract only) .....  | 38 |
| BAUM B.R.: Inferring genetic relationship among haplomes in <i>Triticeae</i> : The utility of the 5S DNA units with examples .....                             | 39 |
| GONCHAROV N.P.: Comparative-genetic analysis – a base for wheat taxonomy revision .....  | 52 |
| KAWAHARA T., YAMANE K.: Phylogeny of <i>Aegilops</i> and <i>Triticum</i> inferred from sequence data of cpDNA (abstract only) .....                            | 57 |
| JAKOB S.S., BLATTNER F.R.: Phylogeographic analysis of the Mediterranean <i>Hordeum maritimum</i> Species Group ( <i>Poaceae</i> ) (abstract only) .....       | 58 |
| LU B.-R., LIU Q.: The possible origin of the “StY”-genome <i>Elymus</i> : a new mechanism of allopolyploidy in plants (abstract only) .....                    | 58 |
| BARKWORTH M.E., MCGREW J.: Combining herbarium data with spatial data: potential benefits, new needs .....   | 59 |

### POSTER SESSION I

|  |    |
|--|----|
| BARKWORTH M.E., MCGREW J., ZHU G.: The <i>Triticeae</i> in China .....   | 65 |
| DE BUSTOS A., JOUVE N.: Phylogenetic Study of <i>Aegilops</i> species and their relation with <i>Triticum</i> and <i>Secale</i> analysed by glutenin genes .....               | 70 |
| GERUS D.E., AGAFONOV A.V.: Introgression between <i>Elymus caninus</i> and <i>E. fibrosus</i> as revealed by morphology and one-dimensional SDS-electrophoresis .....          | 74 |
| AGAFONOV A.V., GERUS D.E., SALOMON B.: A Biosystematic study of <i>Elymus charkeviczii</i> , <i>E. mutabilis</i> and <i>E. subfibrosus</i> from the Peninsula Kamchatka .....  | 79 |
| BADMAYEVA N.K., AGAFONOV A.V.: Electrophoretic variation of endosperm proteins and its use for taxonomy and biosystematics in the genus <i>Leymus</i> ( <i>Poaceae</i> ) ..... | 86 |

|  |    |
|--|----|
| JAKOB S.S., BLATTNER F.R.: A chloroplast genealogy reveals the impossibility of obtaining correct phylogenetic inference from chloroplast data in <i>Hordeum</i> L. ( <i>Poaceae</i> ) (abstract only) ..... | 91 |
| KISHII M., WANG R.R.-C., TSUJIMOTO H.: GISH analysis revealed new aspect of genomic constitution of <i>Thinopyrum intermedium</i> .....  | 92 |
| KOMATSUDA T., AZHAGUVEL P., VIDYA-SARASWATHI D.: Are North African barleys of type Eastern or Western? (abstract only) .....   | 96 |
| MAHELKA V., KRAHULEC F.: Hybridization in <i>Elytrigia</i> at Two ploidy levels: parents, progeny, chromosome numbers and genome size (abstract only).....   | 97 |
| STEWART A.V., ELLISON N., SALOMON B.: Genomic C-constitution of the New Zealand <i>Triticeae</i> .....   | 96 |

## SESSION II: BIODIVERSITY AND CONSERVATION

CHAIRMAN: ROLAND VON BOTHMER, MARY BARKWORTH, NIKOLAY P. GONCHAROV

|  |     |
|--|-----|
| SATO K., TSUJIMOTO H., BOTHMER R. VON : Introduction of genetic diversity into cereals from their wild relatives (key note) .....  | 103 |
| JONES T.A., LARSON S.R.: Development of native Western North American <i>Triticeae</i> germplasm in a restoration context (key note) .....   | 108 |
| ARZANI A., KHALUGHI M.-R., SHIRAN B., KHARAZIAN N.: Evaluation of diversity in wild relatives of wheat (key note) .....  | 112 |
| HOLUBEC V.: <i>Triticeae</i> biodiversity and conservation, a "genebanker" view.....   | 118 |
| BÖRNER A., RÖDER M.S., CHEBORAR S., VARSHNEY R.K., WEIDNER A.: Molecular tools for genebank management and evaluation .....  | 122 |
| VARSHNEY R.K., PRASAD M., KOTA R., SIGMUND R., BÖRNER A. VALKOUN, J., SCHOLZ U., STEIN N., GRANER A.: Functional molecular markers in barley: Development and applications .....   | 128 |
| FAROOQ S., AZAM F.: <i>In vivo</i> conservation of agro-biodiversity: A selective but practical approach for its sustainable utilization .....   | 134 |
| SUN G.: Molecular diversity of <i>Elymus trachycaulus</i> complex species and their relationships to other <i>Elymus</i> species (abstract only) .....   | 140 |
| BALYAN H.S., GUPTA P.K., RUSTGI S., BANDOPADHYAY R., GOYAL A., SINGH R., KUMAR A., KUMAR N., SHARMA S.: Development and use of SSRs of bread wheat for genetic and physical mapping and transferability to the species of <i>Triticum-Aegilops</i> complex ..... | 141 |
| HAMMER K.: Remarks to the breeding systems of the <i>Triticeae</i> with special reference to the pollen to ovule ratios .....  | 145 |
| OVESNÁ J., NGUYEN M.-C., KUČERA L., HOLUBEC V.: Diversity of granule bound starch synthase I coding sequence within selected wild and cultivated <i>Triticeae</i> .....  | 154 |
| KNÜPFER H.: Access to genetic resources and biodiversity information in <i>Triticeae</i> (abstract only) .....   | 159 |

### POSTER SESSION II

|  |     |
|--|-----|
| BRADOVÁ J., ŠAŠEK A.: Diversity of gliadins and HMW glutenin subunits in Czech registered wheat varieties .....  | 160 |
| BRADOVÁ J., STEHNO Z., DOTLAČIL L., HERMUTH J.: Diversity of evaluated characters and HMW-Glu alleles in landraces and cultivars of emmer, einkorn and spelt wheat ..... | 164 |

|   |     |
|---|-----|
| CABALLERO L., ALVAREZ J.B., MARTÍN L.M.: LMW glutenin subunits variation in Persian and Polish wheat .....  | 171 |
| CABALLERO L., MARTÍN L.M., ALVAREZ J.B.: Collection and characterisation of populations of spelt and emmer in Asturias (Spain) .....  | 175 |
| FAROOQ S., AZAM F., QURESHI R.M.: Variability for Fe and Zn in selected germplasm growing on stressed lands .....   | 179 |
| HOLUBEC V., DVOŘÁČEK V.: Protein structure variability of <i>Aegilops</i> species .....   | 184 |
| HOLUBEC V., DUMALASOVÁ V., HANZALOVÁ A.: <i>Triticeae</i> Genebank collection as a source of resistance to fungal diseases .....  | 189 |
| KOCOURKOVÁ Z., KOHUTOVÁ Z., VLASTNÍKOVÁ H., SEDLÁK P.: A comparison of electrophoretic separative methods of RAPD products of wheat ( <i>Triticum aestivum</i> L.) (abstract only) .....  | 193 |
| KOMATSUDAA T., MANOA Y., TURUSPEKOV Y., HONDAB I., KAWADAB N., WATANABE Y.: Inheritance and genetic diversity of flowering types in barley (abstract only) .....  | 194 |
| KOVÁŘOVÁ P., KUBALÁKOVÁ M., SUCHÁNKOVÁ P., BARTOŠ J., ČÍHALÍKOVÁ J., DOLEŽEL J.: A flow-based toolkit for dissection of <i>Triticeae</i> genomes (abstract only) .....  | 195 |
| KRYSTKOWIAK K., ADAMSKI T., KACZMAREK Z., SURMA M.: Genotypic and phenotypic distances between chosen varieties of wheat ( <i>Triticum aestivum</i> L.) (abstract only) .....   | 196 |
| LEIŠOVÁ L., BRADOVÁ J., GREGOVÁ E.: Diversity of HMW-Glu aalleles in landraces and cultivars of winter wheat ( <i>Triticum aestivum</i> ), spelt ( <i>Triticum spelta</i> ) and emmer ( <i>Triticum dicoccoides</i> ) (abstract only) .....   | 197 |
| STEHNO Z., DOTLAČIL L., FABEROVÁ I., BAREŠ I.: Development and structure of wheat collection in the Research Institute of Crop Production, Prague .....   | 198 |
| SUCHÁNKOVÁ P., KUBALÁKOVÁ M., KOVÁŘOVÁ P., BARTOŠ J., ČÍHALÍKOVÁ J., ENDO T., DOLEŽEL J.: Dissecting the barley genome to chromosome arms by flow sorting (abstract only) .....   | 201 |
| ŠAFÁŘ J., JANDA J., BARTOŠ J., KUBALÁKOVÁ M., KOVÁŘOVÁ P., ČÍHALÍKOVÁ J., ŠIMKOVÁ H., SOURDILLE P., BERNARD M., CHALHOUB B., DOLEŽEL J.: Development of BAC resources for genomic research on wheat (abstract only) .....   | 202 |
| ŠVEC M., P. CIVÁŇ P., MIKULOVÁ K., KUČTA T., SIEKEL P., HAUPTVOGEL P., MASÁK Š.: DNA polymorphism in some samples of European emmer .....   | 203 |
| WAREK U., BEDELL J.A., BUDIMAN M.A., LAKEY N.: GeneThresher® methylation filtering technology – A path to rapid gene and marker discovery in plants (abstract only) .....   | 207 |
| WATANABE N., TAKESADA N., FUJII Y., MARTINEK P.: The Genes on homoeologous group 3 chromosomes determine brittle rachides in <i>Triticum</i> and <i>Aegilops</i> .....  | 208 |
| ZÁMEČNÍK J., HOLUBEC V.: Heterogeneity in carbon isotope discrimination in leaves, stalks and spikes of ten annual wild <i>Triticeae</i> species .....  | 212 |
| ŽOFAJOVÁ A., MASAR S., UŽÍK M.: Anther culture derived progeny of winter wheat with rye-translocation (abstract only) .....   | 218 |
| SVENSSON J. T., XU J., ZHENG J., WITT H.N., CONDAMINE P., WANAMAKER S., MADISHETTY K., YOU F.M., LUO M.-CH., ROOSE M., JIANG T., CUI X., LONARDI S., CLOSE T.J.: Coupling expressed sequences and bacterial artificial chromosome resources to access the barley genome (abstract only) ..... | 219 |
| BARKWORTH M.E., LIM S. J.: A Triticeae Website: report of discussion (workshop) .....   | 220 |

### SESSION III: BREEDING AND UTILIZATION OF GENETIC RESOURCES

CHAIRMANS: TAKAO KOMATSUDA, HELMUT KNÜPFER, WILLIAM ROGERS, AHMAD ARZANI

|   |     |
|---|-----|
| VALKOUN J.: Wild cereals in breeding (abstract only) (key note) .....   | 227 |
| RUBIO S., JOUVE N., GONZÁLEZ J. M.: Biolistic and Agrobacterium-mediated transient expression of <i>UidA</i> in <i>Triticale</i> immature embryos .....   | 228 |
| HEIDARI B., SAEIDI G., SAYED TABATABAEI B.E., SUENAGA K.: The interrelationships of agronomic characters in a doubled haploid population of wheat.....  | 233 |
| URASHIMA A.S., GALBIERI R., STABILI A.: DNA fingerprinting and sexual characterization revealed two distinct populations of <i>Magnaporthe grisea</i> in wheat blast from Brazil.....                           | 238 |
| SHAHINNIA F., REZAI A.M., SAYED TABATABAEI B.E.: Variation and path coefficient analysis of important agronomic traits in two- and six-rowed recombinant inbred lines of barley ( <i>Hordeum vulgare</i> L.) .. | 246 |
| KONOPKA J., VALKOUN J.: Global database of wheat wild relatives (abstract only) .....   | 251 |
| FAROOQ S., AZAM F.: Salinity tolerance in <i>Triticeae</i> .....  | 252 |
| GOLABADI M., ARZANI A., MAIBODY S.M.M.: Evaluation of variation among durum wheat F <sub>3</sub> families for grain yield and its components under normal and water-stress field conditions .....               | 263 |
| MOHABBATI F.: Effects of salinity on syntethic wheat genotypes .....  | 268 |
| MOOSAVI S. S., YAZDI SAMADI B., ZALI A., GHANNADHA M., OMIDI M., NAGHAVI M. : Investigation the effect of abscisic acid on drought stress introduction in wheat seedlings .....                                 | 273 |

#### POSTER SESSION III

|   |     |
|---|-----|
| BALYAN H.S., GUPTA P.K., KULWAL P.L., KUMAR N.: QTL analyses for three grain quality traits in bread wheat using intervarietal mapping populations .....  | 281 |
| BARTOŠ P., V. ŠÍP, A. HANZALOVÁ, KUČERA L., OVESNÁ J., VALKOUN J., CHRPOVÁ J., HANUŠOVÁ R., DUMALASOVÁ V., STUHLÍKOVÁ E., ZADRAŽIL K.: Utilization of wild relatives and primitive forms of wheat in Czech wheat breeding ..... | 284 |
| BENITO C., FONTECHA G., SILVA-NAVAS J., HERNÁNDEZ-RIQUER V., EGUREN M., ESCRIBANO R.M., MESTRES M. A., GALLEGÓ F.J.: Chromosomal location of molecular markers linked to aluminum tolerance genes in rye (abstract only) .....  | 288 |
| BUREŠOVÁ I., MARTINEK P.: Bread-making quality of <i>Triticale</i> with <i>Glu-D1 5+10</i> introduced into <i>1R</i> (abstract only) .....  | 289 |
| DE BUSTOS A., PÉREZ R., JOUVE N.: Study of the homologous recombination genetic system to improve genetic transformation of wheat .....   | 290 |
| GREGOVÁ E., ŠLIKOVÁ S.: Development of winter wheat genotypes with unique combination of glutenin alleles by marker-assisted selection (abstract only) .....  | 294 |
| HNILIČKA F., PETR J., HNILIČKOVÁ H., MARTINKOVÁ J.: The yield formation in the alternative varieties of wheat .....   | 295 |
| KOCHANOVÁ M., DUMALASOVÁ V., PROKINOVÁ E., RYŠÁNEK P.: Early detection of common bunt in <i>Triticeae</i> by PCR method .....   | 302 |
| KREJČÍŘOVÁ L., CAPOUCHOVÁ I.: Relation of the protein fractions composition to the qualitative parameters of wheat for different ways of utilization (abstract only) .....  | 304 |
| KUCZYŃSKA A., SURMA M., KACZMAREK Z., ADAMSKI T.: The Frequency of transgression effects in F <sub>1</sub> DH, F <sub>2</sub> DH, SSD barley lines (abstract only) .....  | 305 |

|   |     |
|---|-----|
| LUKOVIC J., KRALJEVIC-BALALIC M.: The influence of spikelet position on mass and number of wheat grains (abstract only) .....   | 306 |
| MIKULOVÁ K., ŠVEC M., LUX A., CIVÁŇ P.: Papillar Resistance against powdery mildew fungus in <i>Triticum</i> sp. ....   | 307 |
| MOOSAVI S.S., SAMADI Y.B., ZALI A., GHANNADHA M.R.: Genetic analysis of quantitative traits in bread wheat under normal and moisture stress conditions (abstract only) .....                                  | 311 |
| MOOSAVI S.S., SAMADI Y.B., ZALI A., GHANNADHA M.R.: Evaluation of general and specific combining ability of bread wheat quantitative traits in normal and moisture stress conditions (abstract only) .....    | 312 |
| PETR J., HRADECKÁ D.: Peculiarities of the growth and development of triticale in comparison with wheat and rye (abstract only) .....   | 313 |
| ROGERS W.J., ROBUTTI J.L., LERNER S.E., DI MARTINO A.M., PONZIO N.R., BORRÁS F.S., COGLIATTI M., SEGHEZZO M.L., MOLFESE E.R.: Multivariate RP-HPLC analysis as a tool in quality studies in durum wheat ..... | 314 |
| REBARZ M., MOCZULSKI M., SURMA M., ADAMSKI T.: HMW glutenin composition in wheat doubled haploid populations (abstract only) .....  | 319 |
| SUCHÁNKOVÁ P., KUBALÁKOVÁ M., BARTOŠ J., ČÍHALÍKOVÁ J., ENDO T., DOLEŽEL J.: Dissecting the barley genome to chromosome arms by flow sorting (abstract only) .....  | 320 |
| ŠLIKOVÁ S., GREGOVÁ E., BARTOŠ P., HANZALOVÁ A.: Utilization of alien leaf rust resistance genes for development of resistant wheat genotypes by backcross (abstract only) .....                              | 321 |
| TRČKOVÁ M., RAIMANOVÁ I., STEHNO Z.: Differences among <i>Triticum dicoccum</i> , <i>T. monococcum</i> and <i>T. spelta</i> in rate of nitrate uptake .....   | 322 |
| VĚCHET L., VOJÁČKOVÁ M.: Resistance of wheat ( <i>Triticum aestivum</i> ) to <i>Septoria tritici</i> blotch ( <i>Mycosphaerella graminicola</i> ) on leaf segments (abstract only) .....                      | 325 |
| WAINES J.G., EHDAIE B.: Breeding for root characters and grain yield in wheat .....   | 326 |
| ŽOFAJOVÁ A., MASÁR S., UŽÍK M.: Anther culture derived progeny of winter wheat with rye-translocation (abstract only) .....   | 331 |

## SESSION IV: CLOSING SESSION

CHAIRMAN: KARL HAMMER

|   |     |
|---|-----|
| MACKAY M., BOTHMER R. VON, SKOVMAND B.: Conservation and utilization of plant genetic resources – future directions ..... | 335 |
| AUTHOR INDEX .....  | I   |
